NAVARRA

DELICA was created in 2005 as a line of products for the contemporary home, for the Spanish company Palmadera S.A, a stratified wood manufacturer since 1962.

The company was anxious to bring new products out on the market, which led them to contact the Zoocreative studio (Gorka Ibarгойen, Jaume Ramіrez, Josema Carrillo), with whom they developed the identity project and the design of the first three products that Delica launched on the market.
