Nele Serpieters is a very driven artist, everything in her life revolves around art. Creating a piece of art is like creating a new world to her. She enjoys every stage of the process. When her thoughts are translated into reality, into a piece of art, she starts wondering about the story of the product, the questions arise and this results into starting a new development, a new idea for new pieces. Nele was born on 3 December, 1964. Many years ago, she started with oil painting, and discovered also the textile art while following several

courses. She was very intrigued by its fragile character, the sensibility and symbolism of the material. Today she studies sculpting at the Academy of Fine Arts in Koksijde, where she's being taught by the passionate artists Koen Westerduin and Chantal Gard. Exclusively for Gardeco, Nele Serpieters created "CanArt".
